Narrative Report

Title: Plug It In! An Introduction to WordPress Plugins

Speaker: Ms. Mary Myka Paumba

Date: February 20, 2021

Plugins are one of WordPress' most powerful assets. In essence, plugins are modules you activate on your website to provide a series of features or elements. The functionality you can add to your website depends on what each specific plugin has been created to do. There are a wide selection of plugins, ranging from simple plugins (such as ones that add styling or small theme changes) all the way to extensive plugins (that provide significant changes such as eCommerce integrations or third party connections). There are many different from your theme and work independently, using hooks, filters, short code, widgets and custom code to perform their functionality of plugins.

* Actions (Hooks)

* A Simple WordPress Action

* Creating Your Own Actions

* Executing Your Functions by Calling Your Action

* Using the Mandatory Arguments

* Filters (Hooks) * Executing Your Filter

* Short codes

* Widgets

* A Quick Lesson on Short codes

* A Brief Intro to Widgets

* Classes (Object Orientated Design)
